NaturaLED Introduces New Linear High Bay LED Fixture with Z10 Receptacle for Easy Plug and Play Control Upgrades

Ontario, CA, April 22, 2024 – naturaLED® (www.naturaled.com), a leading provider of innovative lighting solutions, introduces a premium linear LED high bay fixture with selectable wattage and color temperature features as well as preinstalled with a Z10 receptacle for plug and play lighting control upgrades.

The HBL CCT3 Z10 fixture is a high-performance, durable fixture that is ideal for warehouses, gymnasiums, schools, factories, and commercial spaces. Its lightweight, compact design is traditionally sized, so it blends seamlessly into facilities with high ceilings. Engineered to operate through a wide range of temperatures. The advanced diffused lens delivers high lumen output with excellent efficacy and minimizes glare for both comfort and productivity.

Using the selectable wattage and color features, the user can easily customize their lighting options in the field and retailers can stock fewer SKUs.

The preinstalled Z10 receptacle allows for seamless and easy add-on controls. The Z10 receptacle is an industry standard twist and lock receptacle built right into the front of the NaturaLED high bay fixture that offers plug-and-play compatibility with a variety of devices such as low-voltage sensors and controls sold separately.

"Our new HBL CCT Z10 high bay is the most versatile high bay on the market," said Koji Sasaki, President of NaturaLED. "This fixture allows the user to adjust the light output and color temperature while adding or changing out controls in seconds."
